Together, turning vision into reality

A career at Envision Pharma Group may be just what you're looking for!

About Envision Pharma Group

Envision Technology Solutions designs, develops, implements, and supports innovative and strategic management software for our life-sciences clients including Datavision®, the industry-leading publications planning software.

Using prevailing web-based technologies, we build our scalable tools using modern open systems design. Our solutions are based on our unrivaled experience in the life-sciences industry, and a deep understanding of the needs of our clients. Only then do we undertake a rigorous process to build the right solution using the right technologies.

Configuration Quality Tester at Envision Pharma Group

The Configuration Quality Tester is responsible for verifying and testing configuration changes for new client implementations and existing client change cycles. The tester will be responsible for ensuring that the expected quality levels are met for the assigned deliverables.

Roles and Responsibilities of the Configuration Specialist include:

- Verify the system works to standards for each application
- Verify the changes requested by the client match what was configured
- For new clients or new application types – Complete end-to-end testing
- Complete all business requirements and workbook application testing
- Responsible for attending client requirements walk-through-sessions with Client Portfolio Managers.

Professional Requirements:

- Clear communicator (written and verbal) – must have the ability to document issues clearly and communication with various departments in the organization
- Ability to focus on deadlines and deliverables – able to complete tasks in a defined time frame
- Ability to think abstract – thinking about how the application functions and if things do not make sense
- Attention to detail – must be able to clearly document testing issues found and look for impact items, both large and small.

Technical Skills:

- Working knowledge of MS Office products
- Knowledge and experience in technical aspects of software
- Above entry level computer skills
- Ideally will have worked with multiple browsers.
